

TECHNICAL DATA SHEET

ENGINE FLUSHING OIL

Mineral flushing oil

Product code: U350

Product Description:

Engine Flushing Oil is a mineral oil based engine flush containing detergents and dispersants to help remove deposits from engines. These specialised additives work to remove sludge and lacquer from engine components leaving the engine in a suitable condition to receive its next service fill of lubricant.

Applications:

Engine Flushing Oil can be used in both petrol and diesel engines in passenger cars, commercial vehicles and off-highway equipment.

Directions For Use:

1. Run the engine until normal operating temperature is achieved
2. Drain the old oil
3. Fill with Engine Flushing Oil
4. Idle the engine for 5 – 10 minutes
5. Drain the flushing oil
6. Fill with an appropriate engine lubricant

Typical Test Data:

SAE Classification	30
Density @ 20°C	0.875
Kinematic Viscosity @ 100°C (cSt)	5.41
Kinematic Viscosity @ 40°C (cSt)	29.8
Flash Point (COC °C)	210
Pour Point (°C)	-15
